VACCINATIONS: Jurassic Bark Pet Resort REQUIRES a current Rabies and core vaccine for all Pets in our care or receiving services. For your pet's own safety, we HIGHLY recommend the Bordetella Vaccine. We will accept Pets for boarding services without the Bordetella Vaccine; however this is at the owner's risk.

Core Vaccines Required for all Dogs

Rabies Vaccine - Since rabies is an incurable disease that can even inflict humans, law requires administering a rabies vaccine to your Pet. A rabies vaccine is given when the dog is between 16-18 weeks of age. An additional injection is given after one year, after which boosters are given every one to three years.

Distemper Combination Vaccine -This vaccine covers diseases like Distemper Virus, Parvovirus, Adenovirus and Para influenza Virus in a single injection. This vaccination should be administered to the puppy after 6-8 weeks of age. A booster should also be given every 3-4 weeks, till the puppies are 16 weeks old. An additional injection is given after one year, after which boosters are given every one to three years.

Non-Core Vaccines Highly Recommended for Dogs

Bordetella Vaccine (Kennel Cough Vaccine).

This vaccine fights against the bacteria called Bordetella Bronchiseptica that causes kennel cough in dogs. It should be generally administered to puppies that come in large contact with other dogs (during grooming, boarding and/or training classes). It can be taken either annually or semi-annually, depending on the requirement and the level of risk the dog is open to.

Core & Non-Core Vaccines for Cats

Core cat vaccines include rabies, feline distemper, feline herpesvirus and calicivirus.

Non-core cat vaccines include feline leukemia and bordetella or kennel cough. Core vaccines should be given to every cat. Non-core vaccines are reserved for cats that are deemed high-risk.

Please read and acknowledge the following regarding Vaccinations:

I, a the pet owner, agree to allow 7 days waiting period after my pet as had their vaccinations to allow the vaccines to reach full protection potential and to ensure my pet has not has any negative reaction to the vaccines. Should I allow my pet to stay at Jurassic Bark Pet Resort less than 7 days after vaccination, I understand that my pet could be at risk of contracting a contagious virus/disease.

I, as the pet owner, understand that while my pet is fully vaccinated that vaccines are not guaranteed and there is a small risk that my pet may contract a contagious disease or illness. I agree that should this occur I am responsible for my own pet's care and medical attention.
